SUBJECT: WAKEFIELD – Seven Lakes Provisions, 1260 Province Lake Road, ; Underground Storage Tank Piping Closure Report prepared by StoneHill Environmental, Inc., dated July 17, 2013, (DES Site #199608010; UST #0113050)

Dear Mr. St. Germain:

The New Hampshire Department of Environmental Services (DES) has reviewed the report for the May 29, 2013 piping closure and upgrade at the above referenced facility. Based upon the information contained in the report, DES has concluded that:

1. It does not appear that a discharge of petroleum that would ultimately impact surface water or groundwater of the State has occurred **related to this piping**. Therefore, DES will not require additional investigation or remedial measure **related to this piping removal**.
2. The owner(s) of this facility must meet the goals of the N.H. Administrative Rules Env-Or 600, *Contaminated Site Management*. That is, groundwater at the site must continue to meet drinking water quality standards. The owner shall not undertake any activities that might result in Ambient Groundwater Quality Standards being exceeded at the site.

DES reserves the right (under N.H. Administrative Rules Env-Or 600, *Contaminated Site Management*) to require hydro-geological investigations and/or remedial measures, if further information indicating the need for such work becomes known.

If you have any questions, please contact me at the Waste Management Division.

Sincerely,

Charles Berube, P.G.
