<p>On May 4, 2018 Mr. Wood and I arrived on-site at 12:20 p.m. We arrived on the Myrtle Street entrance and found the entrance gate was locked. We then drove to the Foster Street entrance and once again the gate was locked. The entire west side of the facility was fenced in. I then drove to the east side main entrance from Laurel Street. The gate on the north side of the property was unlocked and wide open. We drove over a small narrow bridge and identified several manhole covers. The manhole on the south side from the bridge was full of used oil. We measured the tank with a string and found approximately 4.5' of used oil in a holding tank. We recovered the holding tank and noticed staining around a blue 55-gallon drum full of used oil. The vent next to the drum is stained with used oil.</p> <p>Secured from the site at 12:50 p.m.</p>
