**Underground Storage Tank Closure Report**, prepared by Tomforde  
Environmental Services, LLC, dated April 15, 2022

Dear Mr. Lacozzi:

The New Hampshire Department of Environmental Services (NHDES) has completed its review of the above-referenced report related to the removal of Tank #4 (10,000-gallon gasoline) and Tank #5 (10,000-gallon diesel), and other information in our files for the referenced site. NHDES approves the report as meeting the requirements of [Env-Or 408.10](#).

Based upon the information contained in the report, it does not appear that a discharge of petroleum that would ultimately impact surface water or groundwater of the State has occurred related to these tanks. Therefore, NHDES will not require additional investigation or remedial measures related to these tank removals.

The owner(s) of this facility must meet the requirements of the [N.H. Administrative Rules Env-Or 600, Contaminated Site Management](#). That is, groundwater at the site must continue to meet drinking water quality standards. The owner shall not undertake any activities that might result in Ambient Groundwater Quality Standards being exceeded at the site.

NHDES reserves the right (under N.H. Administrative Rules Env-Or 600, *Contaminated Site Management*) to require hydro-geological investigations and/or remedial measures, if further information indicating the need for such work becomes known.

Please do not hesitate to contact me if you have any questions regarding this letter.

Sincerely,

Andrew C. Fulton, P.G.
