RE: WORK PLAN FOR SAMPLING OF WATER SUPPLY WELLS AND PROVISION OF ALTERNATE WATER - ADDENDUM 4
SAINT-GOBAIN PERFORMANCE PLASTICS
701 DANIEL WEBSTER HIGHWAY, MERRIMACK, NEW HAMPSHIRE
NHDES SITE NO. 199712055

Dear Mr. Marts:

On behalf of Saint-Gobain Performance Plastics (SGPP), Golder Associates Inc. (Golder) is submitting this Addendum 4 to the New Hampshire Department of Environmental Services (NHDES) for work completed under the September 30, 2019 Work Plan for Sampling of Water Supply Wells and Provision of Alternate Water (September 2019 Work Plan, Golder, 2019a).

Work Plan and Addenda

Golder submitted the Work Plan for Sampling of Water Supply Wells and Provision of Alternate Water to NHDES on September 30, 2019 (September 2019 Work Plan, Golder, 2019a). In a letter dated October 3, 2019 (NHDES, 2019a), NHDES approved the sampling proposed in the September 2019 Work Plan and requested "a list of properties…for the next round of sampling that includes, but is not necessarily limited to, properties that are proximal to wells with PFOA concentrations that are above the AGQS of 12 ppt".

In response to the October 3, 2019 NHDES request, Golder submitted the Work Plan for Sampling of Water Supply Wells and Provision of Alternate Water – Addendum 1 on November 1, 2019 (Work Plan Addendum 1, Golder, 2019b). In a letter dated November 5, 2019 (NHDES, 2019b) NHDES approved Work Plan Addendum 1 and requested:

- Sampling of water supply wells at schools and licensed childcare facilities within the Outer Boundary.
- Sampling or confirmation of water supply status of properties that were assumed to be connected to a public water supply and adjacent to properties that are eligible for alternate water.
- Implementation of a dynamic strategy that continues to work to identify impacted water supply wells.

Golder responded to these requests in the Work Plan for Sampling of Water Supply Wells and Provision of Alternate Water – Addendum 2 submitted to NHDES on December 16, 2019 (Work Plan Addendum 2, Golder, 2019c). In a letter dated December 17, 2019 (NHDES, 2019c) NHDES approved Work Plan Addendum 2 and requested sampling of school and childcare facilities connected to non-transient non-community public water supplies.

Golder submitted the Work Plan for Sampling of Water Supply Wells and Provision of Alternate Water – Addendum 3 to NHDES on January 6, 2020 (Work Plan Addendum 3, Golder, 2020a). NHDES approved Work Plan Addendum 3 in a letter dated January 7, 2020 (NHDES, 2020).

Golder Associates Inc.

Identification of Wells for Sampling

Golder used the following screening approach to identify properties for sampling or confirmation of water supply status under Addendum 4 as shown on Figures 1A through 1F and listed in Table 1:

- **Proximal Parcels:** properties that are within a 60-foot offset of the boundary of properties that have been offered interim alternate water since submittal of Addendum 3.
- **Additional Parcels:** select properties in areas adjacent to proximal parcels or in areas of relatively lower sample density

Figure 1 identifies properties as “connection to PWS confirmed” if the properties have been identified as connected to public water by public water suppliers. Starting with Addendum 4, Golder will not include properties identified as “connection to PWS confirmed” in the addendum for sampling or confirmation of water supply status because public water suppliers have identified that these properties are connected.

Properties within the Outer Boundary not currently identified for sampling under the 2019 Work Plan or associated addenda will be considered during the development of future addenda as described in Section 3.2 of the September 2019 Work Plan.

Next Steps and Schedule

Sampling and provision of alternate water at properties identified in the 2019 Work Plan and associated addenda will continue. SGPP will complete the following activities following NHDES approval of Work Plan Addendum 4:

- Initiate contact with and provide access agreements to owners of properties identified for sampling within 30 days of Addendum approval.
- Coordinate sampling of a property’s well(s) within 60 days of access agreement acceptance by the property owner(s).

The schedule for responding to results and reporting to NHDES is included in Section 5 of the September 2019 Work Plan.

If you have any questions regarding this Addendum, please call Mr. Ross Bennett at (603) 668-0880.

Sincerely,

Golder Associates Inc.

Addendum 4 Properties

- Identified for Sampling or Confirmation of Water Supply Status

Work Plan and Addendum 1, 2 & 3 Properties

- Identified for Sampling or Confirmation of Water Supply Status
- Occupants have been Offered Bottled Water
- Identified for Sampling Where Occupants have been Offered Bottled Water

Property-Water Main Status

- Access to Alternate Water (if applicable) confirmed by Consent Decree
- Connection to PWS Confirmed
- Access to Water Main is Likely
- Access to Water Mains is not Likely
- Potential Other Sources
- Fire Stations 2500 ft Buffer
- Airport Potential Source Boundary
- Landfill Boundary 2000 ft Buffer
- Landfill - Approximate GMZ Boundary Before AGQS

NOTE(S)

1. PRE-GMZ BOUNDARY AND OUTER BOUNDARY FROM ATTACHMENT C OF CONSENT DECREE, STATE OF NEW HAMPSHIRE, DEPT. OF ENVIRONMENTAL SERVICES V. SAINT-GOBAIN PERFORMANCE PLASTICS CORPORATION, MARCH 20, 2018.
2. BOTTLED WATER STATUS DETERMINED BY PFOA CONCENTRATIONS USING DATA PROVIDED BY NHDES IN NOVEMBER 2019 PLUS PARCELS IDENTIFIED BY NHDES AFTER WORK PLAN AND ADDENDUM 1, 2 AND ADDENDUM 3 SUBMITTAL.

LEGEND

- Saint-Gobain Merrimack Facility
- Pre-GMZ Boundary (see Note 1)
- Outer Boundary (see Note 1)
- Town Boundary
- NHDES Sample Location
- Golder Sample Location

PFOA Results

- Non-detect
- ≤12 ppt
- >12 ppt

Addendum 4 Properties

- Identified for Sampling or Confirmation of Water Supply Status

Work Plan and Addendum 1, 2 & 3 Properties

- Identified for Sampling or Confirmation of Water Supply Status
- Occupants have been Offered Bottled Water
- Identified for Sampling Where Occupants have been Offered Bottled Water

Property-Water Main Status

- Access to Alternate Water (if applicable) confirmed by Consent Decree
- Connection to PWS Confirmed
- Access to Water Main is Likely
- Access to Water Mains is not Likely
- Potential Other Sources
- Fire Stations 2500 ft Buffer
- Landfill Boundary 2000 ft Buffer
- Landfill - Approximate GMZ Boundary Before AGQS
