RE: HB 426 *An act relative to shoreland septic systems.*

Dear Chair Renzullo and Members of the Committee:

The Rivers Management Advisory Committee (RMAC) is writing to express its support of House Bill 426, which requires a septic system assessment prior to the sale of developed waterfront property.

This bill expands the number of properties required to complete a site assessment study when waterfront property is sold. Failed septic systems are a major contributor of bacteria and nutrients to New Hampshire's rivers and lakes. Bacteria can cause gastrointestinal illness for those who swim in our waters, and nutrients are the prime cause of toxic cyanobacteria blooms which can close our beaches and harm our pets who drink and swim in the water. Landowners should know the status of their septic systems and keep maintenance records as they would for any aspect of property management. Requiring owners of any waterfront property sold to assess the condition of the septic system, if the system was approved by the New Hampshire Department of Environmental Services (NHDES) more than 20 years prior, is an important step toward ensuring that our public surface waters are protected for the enjoyment of all.

The RMAC is a legislatively created body charged to work with NHDES to administer RSA 483, the Rivers Management and Protection Program. The Governor and Council appointed Committee is comprised of members from business, agriculture, hydroelectric, municipal government, water supply, conservation, recreation, fish and game, and historical interests. Among its other responsibilities, the RMAC is charged with reviewing legislation relevant to the Program and with advising the NHDES Commissioner on the merits of such legislation.

In conclusion, the RMAC supports HB 426 to ensure that water quality in our rivers and lakes remains good, protecting the health of residents and visitors who enjoy New Hampshire's surface waters.

Should you have any questions regarding our testimony, please feel free to contact me at 603.796.2615 or MLT@naturesource.net.

Sincerely,

Michele L. Tremblay
RMAC Chair
