

SAVE THE DATE

“Sable the Sniffer” and his sidekick,
Logan, are coming to the Seacoast

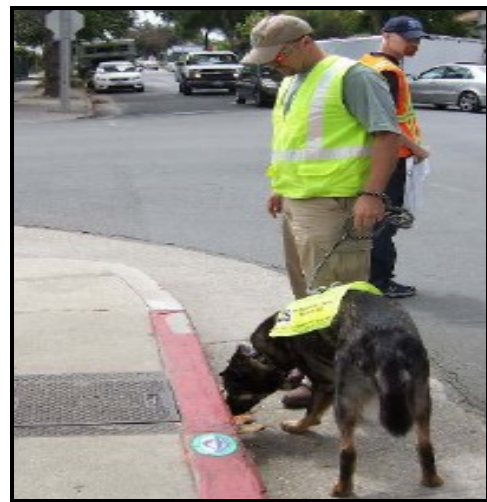

FB Environmental is pleased to be
hosting the dogs from
Environmental Canine Services
(Vermontville, MI)

AUGUST 7th - 10th

About the dogs:

Sable and **Logan** are scent-trained canines that
can identify human sources of bacteria even at
low levels.

This method has been shown to be an effective
and inexpensive alternative to detect illicit dis-
charges in municipal storm sewer systems.

Activities will include:

- Bacteria source tracking in Kittery, Maine and other nearby New England communities
- A workshop for professionals (i.e. town officials, DPW directors, etc.) to learn about and discuss canine scent tracking for stormwater investigations and to satisfy permit requirements.
- “Meet the dogs” event that will include demonstrations to be held in Kittery
