

# Gravel Roads Ruts and Washouts!

## Gravel Roads Workshop

**G**ravel road guru, Russ Lanoie, will give a workshop on gravel road maintenance techniques that can improve performance and durability of gravel roads, reduce long-term road maintenance costs, and most importantly, protect water quality by reducing stormwater runoff to nearby lakes and streams.

The morning workshop will provide individuals and road associations with information on proper road construction techniques and the basic principles behind maintaining gravel/dirt roads that will provide excellent year-round service and present minimal pollution problems. The morning workshop will be followed by a site visit to assess a nearby road.

This is a practical workshop based on Lanoie's gravel road maintenance manual, 'A Ditch in Time', which will be available for purchase at the workshop.

**Workshop  
sponsored  
and hosted  
by:**

**July 11, 2015**

**9:00am - 12:30pm**

Balmoral Improvement Association Clubhouse
