

Plan NH presents:

BUILDING COMMUNITY RESILIENCE

Learning to serve our built and social infrastructures through ecological design

Join NH's own Steve Whitman in this *introductory session* on building community resilience through ecological design. Steve will share a framework that can be used to guide future land use changes – locally and regionally. Informed by a holistic design process, communities can then meet residents' needs, support economic development, and protect and restore ecological functions.

Thursday August 13 2015

Weirs Community Center, Laconia

6:10 – 8:30 PM

(doors open at 6:10, workshop starts PROMPTLY at 6:30)

This workshop will be useful for select board members, planning boards, conservation commissions, planners, landscape architects and anyone interested in the future of their community. For more information and to register, go to www.plannh.org.
